# Series CGSY radial grippers 180° opening

Double acting, magnetic, self-centering  
Size: 10, 16, 20, 25

SERIES CGSY RADIAL GRIPPERS

Series CGSY has been designed to guarantee constant performance over time, even in demanding applications that require high levels of productivity. The gripper's opening angle of 180° enables operation in large work areas, while at the same time optimizing product handling. This makes it particularly suitable for duties such as blowing PET bottles and in filling applications for the food or chemical industries.

Its design and the materials used assure accurate operation even in harsh environments contaminated with dust or vapour and in applications where frequent washdown is usual. Series CGSY grippers guarantee precision and flexibility during installation. Each gripper has calibrated holes on the base and side for very precise positioning.

- » Robust, compact and light design
- » High gripping force
- » Fixing from below and from the side
- » Precision and positioning repeatability
- » High interchangeability (bushes and centering plugs)
- » Position detection (front) thanks to the use of Series CSD magnetic proximity switches
- » In compliance with ROHS directive
- » High speed opening and closing
- » Variants available: for use in ATEX zones
- » Protection against impurities at the inlet

## GENERAL DATA

Type of construction	Radial gripper
Type of operation	Double-acting
Sizes	10, 16, 20, 25
Force transmission	Cam system
Closing torque at 6 bar	50 - 790 Ncm
Opening/closing angle	2x90°
Air connections	M5
Operating pressure	2 ÷ 8 bar
Operating temperature	5°C ÷ 60°C (standard)
Store temperature	-10°C ÷ 80°C
Maximum use frequency	3 Hz
Repeatability	0.05°
Medium	Filtered air in class 7.4.4 according to ISO 8573-1. In case lubricated air is used, we recommend ISOVG32 oil and to never interrupt lubrication.
Compatibility	RoHS Directive
Certifications	ATEX (II 2GD c IIC 120°C(T4)-20°C≤Ta≤80)
Materials	PTFE, Silicone and Copper free
Compatible magnetic proximity switches	Series CSD

NOTE: Pressurize the pneumatic system gradually in order to avoid uncontrolled movements
