

Series MX take-off blocks

MX2 port: G1/2 - MX3 port: G1

Modular

- » Compact design
- » Available with or without VNR (no return valve)
- » Pressure switches available on request

The Take-off blocks, when equipped with a no return valve, can be used to bleed non lubricated air.

The Series MX has been realized to offer a multi-sector solution that guarantees saving in terms of installation time, space and costs.

A special configurator, available on Camozzi website at http://catalogue.camozzi.com (sec. Configurators), allows the customer to choose the most suitable solution for his application, selecting single components or by configuring assembled FRLs.
