CORE SOLUTIONS - BULK MATERIAL HANDLING

Scraper Cylinders

Heavy duty rod scraper to ensure long cylinder service life

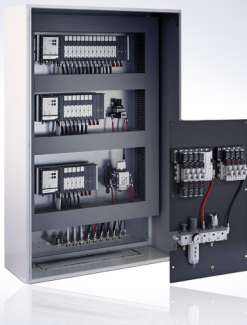

A full range of cylinders for the bulk materials handling industry including options with a metal scraper for environments where the piston rod may be exposed to e.g. powder or cement.

Dual Seal Super Rapid Fittings

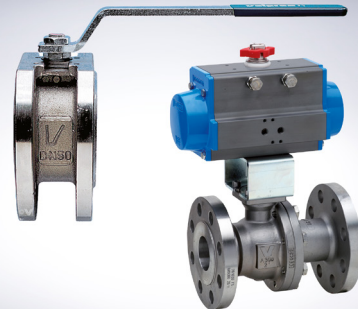

Premium quality fittings are available in a choice of nickel plated brass, composite or stainless steel body options. Dual seal options are also available designed for dirty and dusty environments

Panels, Systems & Kits

Bespoke systems which integrate electrical and pneumatic components can be designed and built in the UK at The Fluid Power Centre.

Process Valves & Actuators

Our process valves and actuators are supplied from our co-located sister company to ensure guaranteed compatibility.
