Electropneumatic, pneumatic and manual version  
Ports G1/4, G3/8 and G1/2  
Modular

SERIES MC LOCKABLE ISOLATION VALVES

- » Standard tamperproof lock-out (manual valve)
- » Actuation at 24 V, 110 V or 230 V
- » Exhaust in atmosphere

The 3-way lockable isolation valves are available in the electropneumatic, pneumatic and manual version and are designed to block the air inlet of the FRL group and so pressurise and depressurise the equipment.

Positioning of these valves is often before the FRL unit. The lockable isolation valves are available with ports G1/4, G3/8 and G1/2 and can be panel mounted.
